- Governance, strategic planning and management of HEIs
- Internationalisation of Higher Education Institutions
- Quality assurance processes and mechanisms
- Internationalisation of Higher Education Institutions
- University services
- Equity, access to and democratisation of higher education
- Non-University sector at tertiary educational level
- Recognition of qualifications and Qualification frameworks
- University-enterprise cooperation
- Development of school and vocational education
Title: Development of professional standards with the involvement of enterprises.

Rationale: NQF has been adopted in Kazakhstan. At present Sectoral qualifications and professional standards are under development. However, this process is hindered by the lack of capacity on the part of employers’ organisations who are not well prepared to actively participate in this activity. HEIs are taking the lead in this process, thus academic approach is prevailing in the content of the standards developed.

Objective: Enhancing sustainable cooperation between higher education and the world of labour through development of professional standards

Contact person: Shaizada TASBULATOVA, Coordinator, National E+ Office, Kazakhstan

Email: nc@erasmusplus.kz
Proposals for new projects (Call IV)

- **Teacher in the society or Teacher for the society**
- **Rationale:** The teaching and learning process in the soviet system of education was teacher oriented. It is of crucial importance to transform the system to ensure that it is learner oriented. However, graduates of teacher training institutions do not have relevant skills to support a learner or client in achieving a specific personal or professional goal by providing training and guidance.
- **Objective:** Reorientation of the teacher training system in Kazakhstan in a specific discipline with a focus towards learner oriented approach
- **Contact person:** Shaizada TASBULATOVA, Coordinator, National E+ Office, Kazakhstan
- **Email:** nc@erasmusplus.kz
Ideas for new projects (Call IV)

- Development of integrated curricula (major-minor)
- Distance learning with a focus to development of training materials (video, textbooks, manuals, etc.)
- Professional orientation of school graduates
