

Are you looking for an opportunity to **kickstart a project** you are thinking about but have no means to develop? Does your project aim to **help your community, promote active citizenship, and tackle a problem** that has been bothering you for years, and is intended to be **carried out within the countries of the European Union**?

garagErasmus Foundation in collaboration with the National Agency for Erasmus+ of Italy has just launched the **2026 edition** of the project **Laissez-Passer for the Erasmus Generation** and this might be exactly what you are looking for.

The Laissez-Passer is the contest where participants who are currently or have been in a mobility experience submit projects that are to be carried out **within the countries of the European Union. The winner is awarded with a grant of €5000,00** allowing them to **kickstart their project**. And more exciting news is yet to come!

The **2026 edition** will award the best project pertaining to the theme of **active citizenship**, which consists of initiatives and activities aiming at encouraging people to participate actively in their community and democratic society by helping individuals understand their rights and responsibilities, contributing to solving social problems, and strengthening civic engagement.

The contest is open to everyone, under conditions that they have had at least 2 months of mobility experience behind them. Candidates that have completed, or are about to complete a mobility period, but not within the Erasmus+ programme, will also be accepted.

All you have to do is to send us your project proposal by [filling the form](#).

If you are interested please contact projects@garagerasmus.org.

The deadline for submission is March 6th, 2026 at 23:59 PM!
