

Climate Action for Planet Earth

Filippo Giorgi
International Centre for Theoretical
Physics, Trieste

Planet Earth is under siege from multiple environmental emergencies

Climate Change

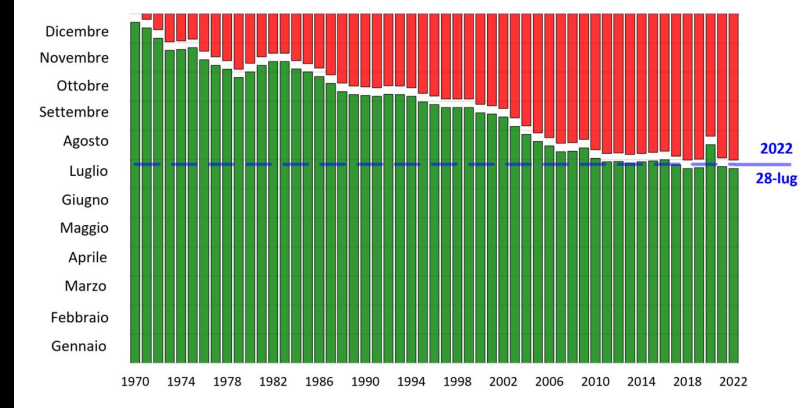

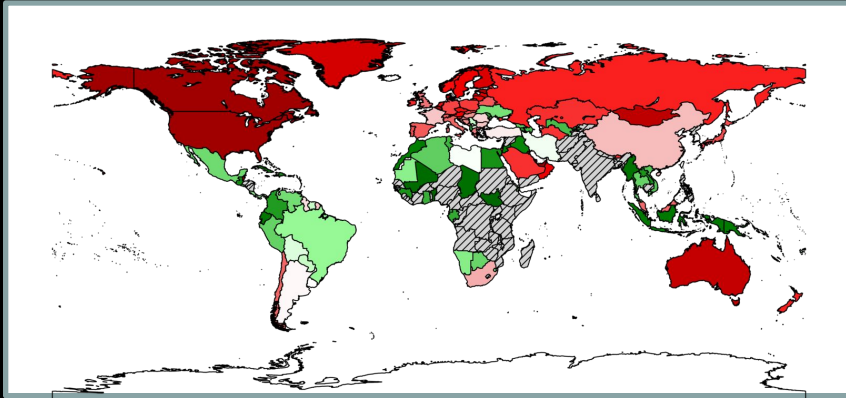

Waste and Plastics

Deforestation and Biodiversity Loss

Drought and Soil Loss

Air and Water Pollution

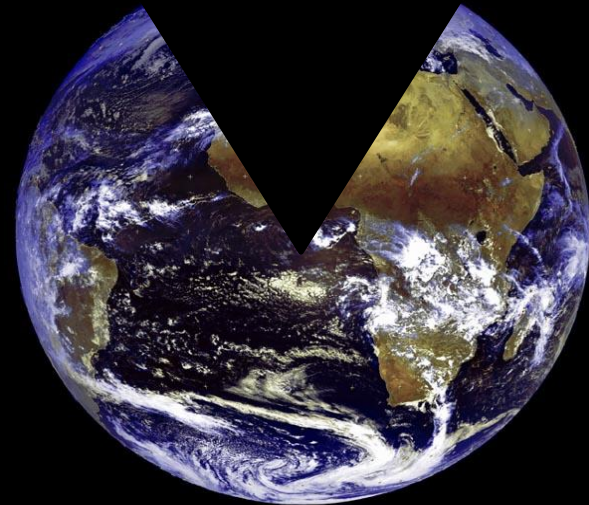

Earth overshoot day

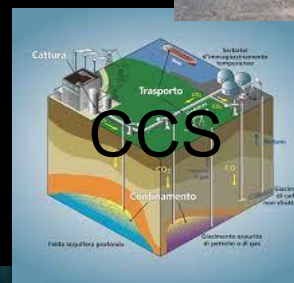

The planet we inherited

The planet we are leaving to the future

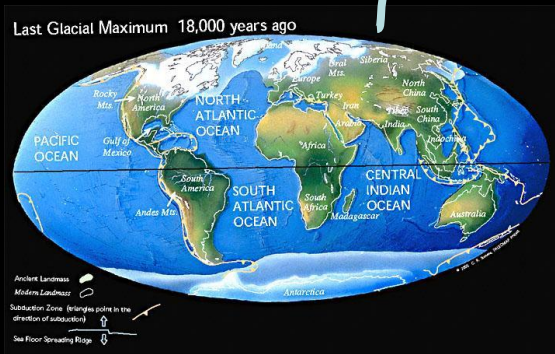

The objective of the Paris Agreement can be reached through the Ecological Transition “The Sustainability Mosaic”.

We do have a choice about our future
and you can have a key role in this choice

Climate is like a thread that connects us to the future

What message shall we leave to the future generations?

**THANK YOU
GRAZIE**
